	Introduction	

OPERATING INSTRUCTION

1. Adding essential oil

Hold the top and bottom of the diffuser and rotate top hand counter clockwise and bottom hand clockwise. Remove/unscrew the oil bottle and add your desired essential oil, then replace the bottle and re-attach the top of the diffuser.

2. Connect power adapter

Connect the power adapter to the lower power access point on the unit [DC POWER IN], plug into the power outlet.

3. Control instruction

① Press this "TIMER" button to turn on & turn off the machine.

A red light indicates "power on", but the device will not begin until a blue light is indicated.

② Pressing the "TIMER" button will toggle thru the 3 durations - 1 hour, 4 hours and 8 hours, press button again to switch the machine off.

③ Pressing the "DENSITY" button will change the output from 25%, 50%, 75% and 100%

④ Pressing the "INTERVAL" button will set a pause duration, either 30 seconds, 60 seconds, 120 seconds or 300 seconds.

Maintenance

The nozzle and other inside parts of diffuser should be cleaned with alcohol before storing for long periods.

To clean put suitable amount alcohol into bottle, let the machine run for 10-15 minutes, then turn off machine and remove any alcohol from the bottle.

- 1) The voltage of machine is DC12V,do not connect to other voltage;
- 2) Do not use machine overload;
- 3) Do not keep machine upside down and tilted with aroma oil in bottle.
